This mini website named College shiksha is a college predictor(predicts college according to your score in different competitive engineering exams like JEE, VITEEE etc) In this project I have used HTML,CSS,JS for the frontend part & PHP for the backend part. I have hosted my site on 000Webhost.com .

Here are some Screenshots:

1)This is the first page i.e., Login /Signup page. (Facebook, Google+, Linked, Forget password buttons are dummy buttons.)

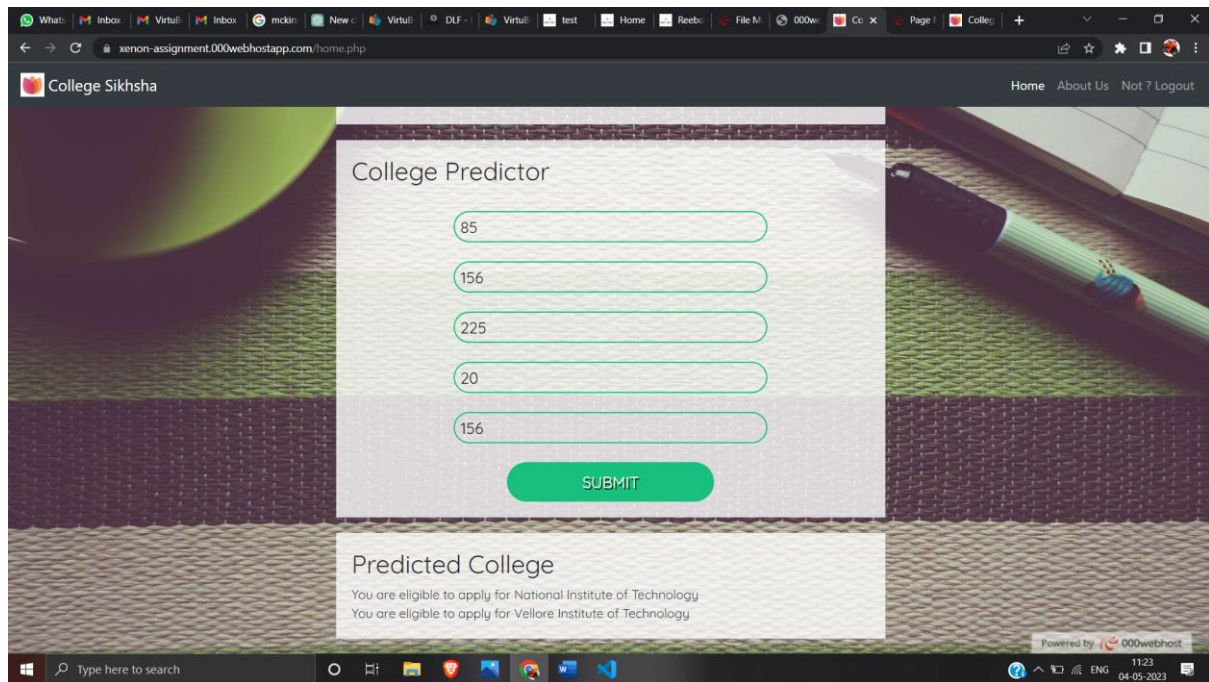

2) After you are logged in home page of the website is displayed.

The screenshot shows a web browser window with the URL `xenon-assignment.000webhostapp.com/home.php`. The page header includes the logo for "College Sikhsha" and navigation links for "Home", "About Us", and "Not ? Logout". A quote at the top reads: "Research shows that there is only half as much variation in student achievement between schools as there is among classrooms in the same school. If you want your child to get the best education possible, it is actually more important to get him assigned to a great teacher than to a great school." Below this is the "College Predictor" form, which contains five input fields: "Board's Percentage", "JEE Score", "BITS Score", "SRMJEEE Score", and "VITEEE Score". A green "SUBMIT" button is located at the bottom of the form. The background of the page features a green bowl, a notebook, and a pen. The Windows taskbar at the bottom shows the search bar and various application icons, with the system clock displaying 11:18 on 04-05-2023.

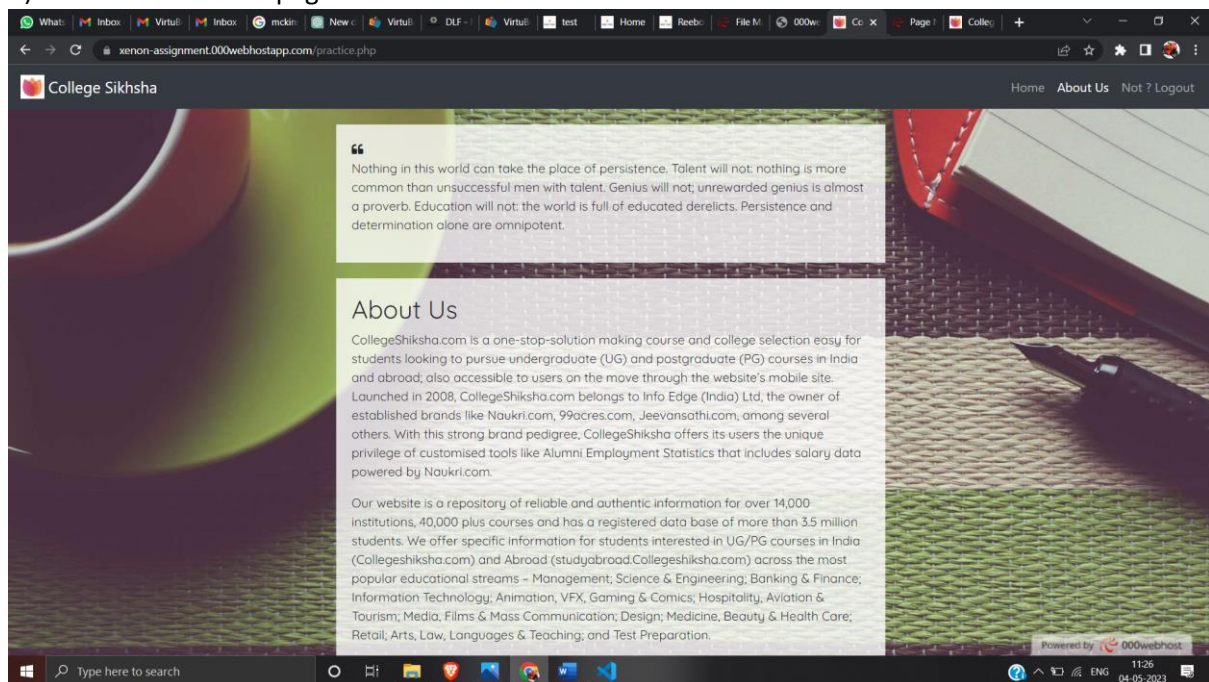

- 3) Here there is a form attached where you can fill your score in different exams and accordingly a college will be predicted for you.

This screenshot shows the same "College Predictor" form as the previous one, but with numerical values entered into the input fields: "85" for Board's Percentage, "156" for JEE Score, "225" for BITS Score, "20" for SRMJEEE Score, and "156" for VITEEE Score. The "SUBMIT" button remains at the bottom. The website header and background graphics are identical to the first screenshot. The Windows taskbar at the bottom shows the system clock as 11:23 on 04-05-2023.

After entering your marks, click on submit button and predicted colleges will appear.

4) This is the About Us page:

I will be honest with you; I faced some problems while hosting the website due to which the login button sometimes does not respond and gives page not found error. The problem is with the hosting not with my code, as it was fully functional on my system.
